FIG. 3

FIG. 1 is a perspective view of a multi-layered cylindrical structure. The structure consists of a central core (30) surrounded by multiple layers (32, 34, 36, 38). The layers are separated by a central vertical channel (35). The structure is capped with a top flange (39) and a bottom flange (38).

FIG. 4A

FIG. 4B

FIG. 5

FIG. 5 is a perspective view of a fluid dispensing and storage system with a drink valve. The system includes a main body (10) with a handle (20) and a valve assembly (30) mounted on the front. A cylindrical component (40) is attached to the top of the main body. The valve assembly (30) features a series of concentric rings and a central opening. The handle (20) is a curved, elongated structure. The cylindrical component (40) has a hatched end face. Dashed lines indicate internal components and the flow path of the fluid.
